HOW TO USE

1. **Pour into a bucket**
   Use the amount you need for your session.
2. **Wet it little by little**
   Add the water in several goes and mix well, without overdoing it.
3. **Let it rest and sieve**
   Wait 10 to 15 minutes for it to soak up the water, then sieve it to aerate it.
4. **Make balls**
   Tight for current or bottom fishing, lighter in still water for an attractive cloud.
5. **Feed the swim**
   Throw in the same spot, at the start and then in small amounts.

FISHING TIPS

- Pond or still water: Pond or Big Fish groundbait, lighter balls.
